XAVIER PEREZ

Senior AI Engineer

Harker Heights, TX · +1 (832) 399-9578 · xavieraperez8@outlook.com

PROFILE

Senior AI Engineer with deep expertise in machine learning, natural language processing, and deep learning. I design and ship scalable, production-grade AI systems that solve complex problems and drive measurable business outcomes — with a focus on healthcare and finance.

CORE SKILLS

ML Frameworks: TensorFlow, PyTorch, scikit-learn, Keras, OpenCV, Hugging Face
NLP: NER, Text Classification, Sentiment Analysis, Transformers, BERT, GPT
Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, SQL
Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, CI/CD, Terraform
Languages: Python, JavaScript, TypeScript, SQL
Tools: Jupyter, Apache Kafka, FastAPI, Nginx
Databases: MongoDB, PostgreSQL, Redis, MySQL

PROFESSIONAL EXPERIENCE

Senior AI Engineer · Supreme Optimization

Dallas, TX (Remote) · 08/2023 – Present

- Spearheaded the design and deployment of ML models for a secure payment gateway, applying NLP and AI to optimize transaction processing and fraud detection.
- Integrated AI models to analyze user behavior patterns, strengthening platform security through anomaly detection.
- Architected scalable AI pipelines on AWS and Kubernetes for large-scale data ingestion and real-time inference.
- Built ML models predicting transaction success rates, reducing transaction failures by 15%.
- Partnered with cross-functional teams to embed predictive analytics and personalized recommendations into the full-stack platform.

AI Solutions Engineer · Origin Hubs

Apex, NC (Remote) · 04/2020 – 07/2023

- Developed a HIPAA-compliant healthcare platform using NLP and ML to predict health risks and support clinician decision-making.
- Built deep learning systems for medical record analysis, including automated patient condition classification and risk assessment.
- Implemented a recommendation engine combining collaborative filtering and deep learning for personalized care.

- Led integration of secure AI-powered APIs with EHR systems, streamlining clinical workflows and ensuring compliance.
- Drove migration to AWS with AI-based predictive services, improving scalability and cutting operational costs by 20%.

Full Stack Developer · AxisCare

Waco, TX (Onsite) · 06/2016 – 03/2020

- Built dynamic React.js front ends and integrated AI models for predictive analytics, improving UX and responsiveness.
- Developed payment microservices with AI-driven fraud detection and security features.
- Integrated AI models for predictive maintenance and automated reporting, optimizing resource allocation.
- Established automated testing with Jest and Cypress to ensure reliable AI model deployment.

SELECTED AI PROJECTS

- **AI-Powered Healthcare Risk Prediction** — Deep learning model predicting patient risk from historical health data; deployed in a clinical setting and improved decision-making accuracy by 25%.
- **NLP Chatbot for Healthcare** — GPT-3-powered assistant answering patient health questions, increasing engagement and accessibility.
- **AI Model Deployment Platform** — Production ML systems with Docker, Kubernetes, and CI/CD pipelines enabling continuous delivery and real-time inference.
- **Sentiment Analysis for Financial Services** — NLP model on financial news, integrated into an investor decision platform to anticipate market movement.

EDUCATION

Bachelor of Science in Computer Science

University of Mary Hardin-Baylor — Belton, TX · 08/2012 – 05/2016

Relevant coursework: Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Computational Neuroscience, Cloud Computing, Data Science.
